

Sanitizing Solutions Overview

- **Spray Bottles** ¼ tsp bleach to 1 quart of warm water. ppm 50-100.
- **Wiping cloth container** 100 ppm =
1-teaspoon chlorine in 1-gallon water
- **Sink compartment**
1-tablespoon chlorine in 3-gallons water

Note: 50 ppm chlorine is the minimum required amount in sanitizing solutions. Be sure to verify the volume of your own buckets, spray bottles, or sink compartments. Check concentration with test strips.
