Wellness Calls

While “Safer at Home” continues, many older adults long for social connection. Words are powerful, they can inspire hope, offer encouragement and strength. Consider asking older adults and caregivers to share words of encouragement with their peers. This allows them to give back and have a purpose. It’s a great way to instill a sense of community and connectedness even when we are apart. Many people want to volunteer and utilizing them to make calls, emails, or texts is a win-win-win for them, the older adult, and our agencies.
