

Hi Teri! It's me again! I have been meaning to send you a picture of my mom on her bike!! It has been a blessing for her since she no longer can drive a vehicle. It has given her that sense of independence to move about when weather permits.

Thanks to ADRC, she has had the opportunity to purchase this and other necessities in the past, as well as being able to attend the program at Curative Connections. It has made her life easier to adjust to and gives her more of a positive outlook for her!!

As a family, we have had such a wonderful and promising experience with this program!!

Sincerely, Julie

Dear Traci,
I would like to thank you and AORC for the support and funds you have provided for me as a caregiver for my husband Kyle who has dementia. Without the funds we wouldn't be able to stay in our home as we need someone to do all our lawn care & snow removal. The funds also help me to be able to go to a movie, out for lunch, water walk, or go shopping for my own well-being. To be able to have someone stay with him. I greatly appreciate your help and hope you continue the funds. It makes being a caregiver a little easier.
Thank you
Karen Baston

This assistance makes our day to day lives very manageable. Raising 2 little boys at 58 & 59 years old is challenging at best and costs sure have gone up since we raised the boy's mother and aunt. This allows us to run errands, grocery shop, grab a sandwich with "big people" now and then and keep our home in order, with funding for the babysitters and housekeeping services. Financially, it takes some pressure off the budget and we are very grateful for this program.
