Developing Our Roadmap

Spend a few minutes reflecting on what topics have emerged from the Spider (Systems) Activity and Big Hairy Audacious Goals training. Then take a few minutes to reflect on the questions below. Share any insights you have gained by reflecting on these questions with your respective Council or Committee at a future meeting. This will help develop your group's collective roadmap and the action steps your Council/Committee needs to take going forward to achieve its goals and mission.

- Is there a new policy issue you feel the Committee or Council you are serving on should be working on that you were not aware of?

- Is there a policy issue you feel the Committee or Council you are serving on should no longer be working on to elevate the other policy issues your Council or Committee is working on?

- Identify one community partner or Council or Committee you feel your Council or Committee should be working or collaborating with on a policy or advocacy issue.

- What is one way your Council or Committee thinks it can engage more effectively community partners or individual stakeholders on policy issues identified today?

- How could your Council or Committee be more effective at utilizing advocacy or other information shared with your to address policy or other goals of your Council or Committee?
